

AUTO FINANCE

ICT OF YESTERDAY - TODAY - TOMORROW!

Dare to take on the challenge of becoming our new

Head ICT Switzerland (f/m/d, 100%)

CA Auto Finance Suisse SA is the Swiss subsidiary of CA Auto Bank S.p.A. and part of the Crédit Agricole Group, one of the leading European Banks. The CA Auto Bank group is well on its way to becoming the leading independent and cross-brand pan-European provider of vehicle financing, leasing and holistic solutions in the mobility sector. The group is headquartered in Turin and has a strong international presence in 19 countries. In Switzerland, we offer advantageous and tailor-made financing solutions and insurance services for the purchase of vehicles, motorbikes, motorhomes, etc. of renowned brands.

Our ICT department consists of a small group of enthusiasts who deal with IT challenges not on a daily, but often on an hourly basis. It is not unusual for us to feel like we are between a hammer and an anvil - but we like it!

To successfully perform this demanding function, you ideally:

- feel comfortable in a multicultural and international environment
- are ready to contribute to the ICT strategy definition to support local business needs, leveraging maximum benefit from investments and communicating the key goals to the organization
- have experience in managing and executing software development projects, coordinating the various external service providers, and ensuring the timely completion of tasks – with your direct involvement if required
- are familiar with the management of third-party contracts involving the delivery of ICT products and services
- have managed data and information ensuring their coherence, availability, accuracy, and security
- can ensure the adoption of a common and effective approach regarding ICT methods, tools, and services at local level, aligning with group standards and targets and exploring innovative approaches to performing business activities
- oversee and manage the inventory of ICT assets, aiming to optimize the total cost of ownership by minimizing operating costs, improving investment decisions, and capitalizing on potential opportunities
- constantly oversee IT security and business continuity matters
- take over ownership and monitoring of the relevant Internal Normative Documentation
- are open to anything else that might pop up on your screen and/or desk

If you think you can meet this challenge, you should talk to us.

How to do that? Send me an [Email](#) and provide me with your phone number. I will then call you to discuss possible next steps.

I look forward to receiving your phone number.

Urs Ruetz
Manager HR & General Services
